

# How to Setup & Run this Project

## ❖ Install NodeJs ( Ignore If Already Installed)

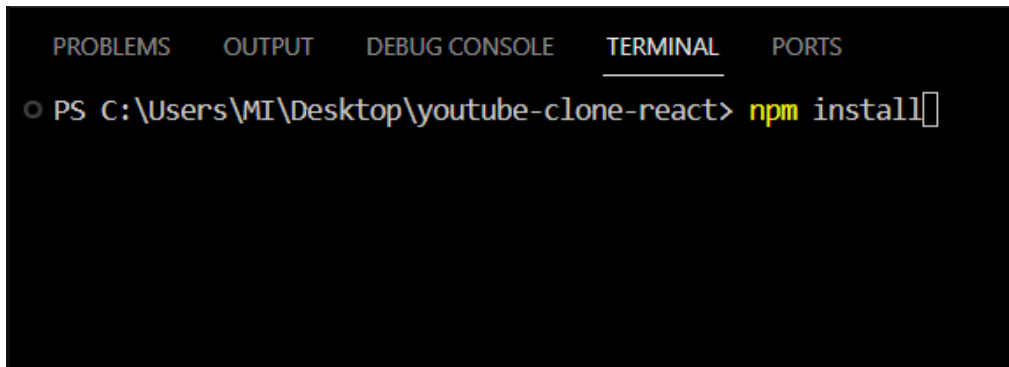

1. Visit the official Node.js website i.e) <https://nodejs.org/en/download/>
2. Download the Node.js installer
3. Run the installer.
4. Follow the prompts in the installer.

## ❖ Steps To Run The Project

1. Open Project Folder In VS Code
2. Open Integrated Terminal
  - Right Click on Sidebar > Select “Open In Integrated Terminal”

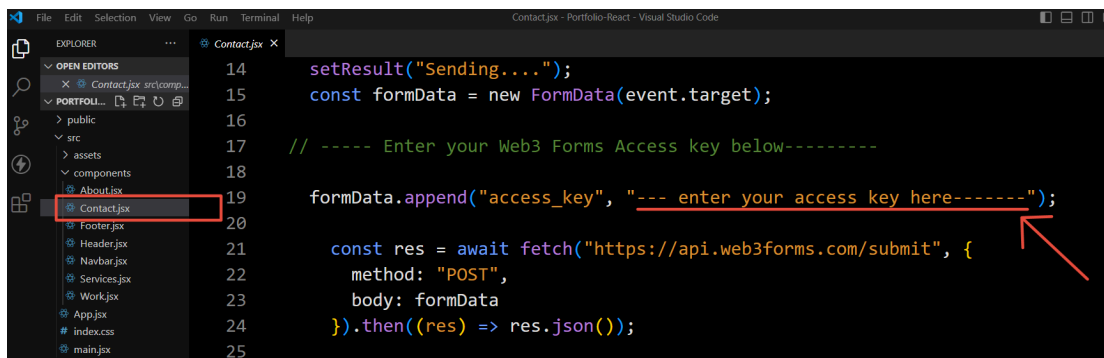

3. Type “**npm install**” and press Enter and Wait for Installation to be completed (requires Internet)

```
PS C:\Users\MI\Desktop\youtube-clone-react> npm install
```

After Installation You will See 'node\_modules' Folder in the Sidebar

4. Create Your Web3 Forms Access Key From [Here](#)
5. Open [Contact.jsx](#) file then paste the Web3 Forms Access Key in that file, to receive the contact from data on email.

```
14 setResult("Sending...");
15 const formData = new FormData(event.target);
16
17 // ----- Enter your Web3 Forms Access key below-----
18
19 formData.append("access_key", "---- enter your access key here-----");
20
21 const res = await fetch("https://api.web3forms.com/submit", {
22   method: "POST",
23   body: formData
24 }).then((res) => res.json());
25
```

6. After that type **"npm run dev"** in terminal
7. Now Copy the Localhost link from terminal and open it in web-browser
